(With What Cutlery),
**Should We
Eat the Rich?**

- I. Why even care about the rich?
- II. The public and the private
- III. The cutlery: a few options

Why Even Care About the Rich?

Income Gains Widely Shared in Early Postwar Decades — But Not Since Then

Real family income between 1947 and 2018, as a percentage of 1973 level

Note: Breaks indicate implementation of a redesigned questionnaire (2013) and an updated data processing system (2017).

“I don’t care about equality. I lose sleep over poverty.”

- Ben Bernanke

Why care about the
rich...

...when we could care
about the

poor.

Unjust

Unfair

Ingrid Robeyns

The rich make it harder to solve the problem of poverty because:

- They interfere in democratic processes through lobbying and the threat of capital flight
- They disproportionately use up resources we could (and should!) use to combat poverty

In a world without poverty, we might not have to care about the rich,

“but we do not live in that world”

Should we
eat the
rich?

Provisional answer:
Only insofar
as they keep
us from
saving the
poor

The Public and the Private

The First Fundamental Theorem of Welfare Economics

- Let \mathbf{x}^* be the allocation at a competitive equilibrium and $u_i(\mathbf{x})$ be the utility of individual i for the allocation \mathbf{x} .

If \mathbf{x}^* is a competitive equilibrium, then:

For all feasible allocations \mathbf{x} , if $u_i(\mathbf{x}) \geq u_i(\mathbf{x}^*)$ for all i , then $u_i(\mathbf{x}) = u_i(\mathbf{x}^*)$ for all i .

The Second Fundamental Theorem of Welfare Economics

- Let \mathbf{x}^P be a Pareto efficient allocation.

There exists a redistribution of initial endowments \mathbf{w}' , such that the competitive equilibrium allocation \mathbf{x}^* resulting from \mathbf{w}' satisfies:

$$\mathbf{x}^* = \mathbf{x}^P.$$

The Fundamental Theorems of Welfare Economics

(assumption) We can improve welfare by satisfying people's preferences

(1) Perfectly competitive markets satisfy preferences – as many as possible! - without dissatisfying other people's preferences.

(2) This works no matter which starting point people have

win-win

When the capital development of a country becomes a by-product of the activities of a casino, the job is likely to be ill-done

— *John Maynard Keynes* —

A rising tide
raises all
boats

The Fundamental Theorems of Welfare Economics*

(Assumption) We can improve welfare by satisfying people's preferences

(1) Perfectly competitive markets satisfy preferences – as many as possible! - without dissatisfying other people's preferences.

(2) This works no matter which starting point people have

- *If we have markets in every commodity*
- *If interactions have no negative effects on other human beings*
- *If everyone knows the price of every good in every single market (and how these relate to each other)*
- *If people always behave like self-interested utility maximizers*

Equality

Sufficiency

Priority

So
Should We
Eat the Rich?

Yes.

If we want to save the poor,
we'll have to eat the rich

The Cutlery: a few options

We ask nicely

- Okay so we don't actually eat the rich
- Because, um... because...
- Somehow raise taxes
- Somehow strengthen unions
- Hope it sticks this time

We eat the shareholders

- ...by all of us becoming shareholders
- Everyone gets government-distributed stock bonds on their 18th birthday
- Public cooperative banks allocate investment
- Firms are turned into worker-cooperatives

We build the new world in the shell of the old

- We leave the rich alone and develop a new system without them
- We build solidarity networks
- We grow food locally
- We champion state-less local democracies

A stylized, high-contrast portrait of Assata Shakur. Her face is rendered in a solid brown color against a black background. Her eyes are white with black outlines, and her lips are a dark brown. The background behind her head is a dark red with a vertical, textured pattern. On the right side of the image, there is a white, jagged, torn-paper-like edge. Overlaid on the left side of her face is a quote in white text.

"Nobody in the world, nobody in history, has ever gotten their freedom by appealing to the moral sense of the people who were oppressing them."

-Assata Shakur
